New engineering programs, including a one-of-a-kind civil engineering major focused on water, will empower Tulane students to explore the challenges and possibilities of the future. (Photo by Kenneth Lass)

Programs at the School of Science and Engineering at Tulane University continue to expand with four new degrees: two undergraduate majors and two Master of Science programs.

“With enthusiastic support from faculty, staff and our generous alumni, engineering at Tulane is roaring back to life!” said Hridesh Rajan, dean of the School of Science and Engineering. “The new degree programs underscore Tulane's commitment to engineering excellence.”

As part of that commitment, the [**Department of River-Coastal Science and Engineering**](#) is introducing a [**Civil Engineering - Water and Environment major**](#) this fall, which builds on the existing Civil Engineering - Water and Environment minor established in 2023.
